MANIK

Ukrainian witch house artist MANIK (Yaroslav Boruk) has emerged as a distinctive voice in the contemporary underground electronic scene since February 2023. MANIK treats performance as ritual rather than entertainment - creating immersive sonic experiences that function as emotional portals for the audience. His influences span witch house, darkwave, industrial, and ambient traditions, with a strong focus on atmosphere over conventional song structure. Currently based in Europe, MANIK continues to expand his sound through live performance formats, collaborative projects, and increasingly cinematic production approaches.

Born in Khmelnytskyi, Ukraine, MANIK's sound evolved from ambient/experimental origins to authentic witch house mastery. The artist's international experience - from Ukrainian underground culture through transformative years in Kumamoto, Japan, to current European base - creates a unique cultural perspective that manifests in atmospheric, emotionally intense productions characterized by heavy reverb, pitched vocals, and haunting synth work to evoke states of dissociation, melancholy, and ritualistic tension.

Working with strategic support from ENIGMATIQUE MEDIA phonk music label, MAN1K has emerged as both artist and cultural architect within the international underground electronic scene. The project extends far beyond individual performance into active scene building and bridge-construction between disparate underground communities.

MAN1K's artistic philosophy centers on uncompromising authenticity over commercial appeal. "My reality and my path" - each composition reflects genuine personal journey rather than calculated market positioning. This commitment stems from lifelong passion for music and unwavering belief in creative freedom. Drawing primary inspiration from the Untitled Burial label MAN1K crafts sonic landscapes that engage the full emotional spectrum simultaneously - refusing false choice between darkness and beauty, aggression and vulnerability.

The NIGHTSHADE TOUR (2024) marked the crucial transition from studio artist to compelling live performer, with ritual-like shows across Ukrainian cities. July 2025 brought career-defining moment: as co-organizer of CHERN Tokyo at HVEN Club, MAN1K served as essential "anchor between Japan and Russia," making possible unprecedented collaboration between Untitled Burial artists, SVD22 collective, and underground talents including exidy, Andy Scream, Slavnayad, and others.

Beyond solo performance, MAN1K founded collaborative duo DeadRay with vocalist Lakomi and actively rebuilds Ukrainian underground infrastructure as new administrator of #YBXP (Ukrainian Witch House Movement), establishing international connections to revitalize the scene. This evolution from individual artist to scene architect demonstrates commitment to building lasting cultural infrastructure rather than pursuing personal success alone.
